Sprint Goal:
- Start android and iOS apps
- Continue development of api including

This sprint went quite well. Tony, Chris and Blake all underwent upskilling on their respective platforms. After their upskilling github repo's were created for their respective applications (ios app, android app and drivers app) and basic layout and features started to be developed. On the api side of things Hayden setup automatic deployment of the dev branch to a development server to enable mobile developers to start developing against the api. Dominic performed work on finishing qr data signing and creating an endpoint for retrieving it. Izaac worked on creating sign in features for Drivers.
