Subject: Ticketing Project Update

Hey,

Hope is everything is well with you. Our project is moving ahead, we are behind schedule but according to our lecturer this is to be expected of most projects at this stage. We are continuing to work on some of the core parts of the system. Last week we designed and wrote code to create and validate QR code data.

This week we have a mid project review document due as well as a in person interview with our supervisors. Once completed we will send through this document for you to have a read

through.

Rest assured we are working on this project but things are taking some time.

Thanks
Hayden and Team
